Juvenile Macular Degeneration (Stargardt Disease) - Pipeline Review, H2 2017

Report Description

Summary

Global Markets Direct's latest Pharmaceutical and Healthcare disease pipeline guide Juvenile Macular Degeneration (Stargardt Disease) - Pipeline Review, H2 2017, provides an overview of the Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) pipeline landscape.

Juvenile macular degeneration is a series of inherited eye disorders that affects children and young adults. The most common form of juvenile macular degeneration is Stargardt disease. Stargardt's disease is an inherited autosomal recessive syndrome. Signs and symptoms include blurry or fuzzy vision, dark, empty spots in the center of vision and difficulty reading or performing detail work. Risk factors include arteriosclerosis, hypercholesterolemia, smoking and hypertension.

Report Highlights

Global Markets Direct's Pharmaceutical and Healthcare latest pipeline guide Juvenile Macular Degeneration (Stargardt Disease) - Pipeline Review, H2 2017, provides comprehensive information on the therapeutics under development for Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology), complete with analysis by stage of development, drug target, mechanism of action (MoA), route of administration (RoA) and molecule type. The guide covers the descriptive pharmacological action of the therapeutics, its complete research and development history and latest news and press releases.

The Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) pipeline guide also reviews of key players involved in therapeutic development for Juvenile Macular Degeneration (Stargardt Disease) and features dormant and discontinued projects. The guide covers therapeutics under Development by Companies
/Universities /Institutes, the molecules developed by Companies in Phase II, Preclinical and Discovery stages are 5, 10 and 1 respectively. Similarly, the Universities portfolio in Preclinical stages comprises 2 molecules, respectively.

Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) pipeline guide helps in identifying and tracking emerging players in the market and their portfolios, enhances decision making capabilities and helps to create effective counter strategies to gain competitive advantage. The guide is built using data and information sourced from Global Markets Directs proprietary databases, company/university websites, clinical trial registries, conferences, SEC filings, investor presentations and featured press releases from company/university sites and industry-specific third party sources. Additionally, various dynamic tracking processes ensure that the most recent developments are captured on a real time basis.

Note: Certain content / sections in the pipeline guide may be removed or altered based on the availability and relevance of data.

Scope

- The pipeline guide provides a snapshot of the global therapeutic landscape of Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology).
- The pipeline guide reviews pipeline therapeutics for Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) by companies and universities/research institutes based on information derived from company and industry-specific sources.
- The pipeline guide covers pipeline products based on several stages of development ranging from pre-registration till discovery and undisclosed stages.
- The pipeline guide features descriptive drug profiles for the pipeline products which comprise, product description, descriptive licensing and collaboration details, R&D brief, MoA & other developmental activities.
- The pipeline guide reviews key companies involved in Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) therapeutics and enlists all their major and minor projects.
- The pipeline guide evaluates Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) therapeutics based on mechanism of action (MoA), drug target, route of administration (RoA) and molecule type.
- The pipeline guide encapsulates all the dormant and discontinued pipeline projects.
- The pipeline guide reviews latest news related to pipeline therapeutics for Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology)
Reasons to buy

- Procure strategically important competitor information, analysis, and insights to formulate effective R&D strategies.
- Recognize emerging players with potentially strong product portfolio and create effective counter-strategies to gain competitive advantage.
- Find and recognize significant and varied types of therapeutics under development for Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology).
- Classify potential new clients or partners in the target demographic.
- Develop tactical initiatives by understanding the focus areas of leading companies.
- Plan mergers and acquisitions meritoriously by identifying key players and its most promising pipeline therapeutics.
- Formulate corrective measures for pipeline projects by understanding Juvenile Macular Degeneration (Stargardt Disease) (Ophthalmology) pipeline depth and focus of Indication therapeutics.
- Develop and design in-licensing and out-licensing strategies by identifying prospective partners with the most attractive projects to enhance and expand business potential and scope.
- Adjust the therapeutic portfolio by recognizing discontinued projects and understand from the know-how what drove them from pipeline.

Featured News & Press Releases
Jul 26, 2017: Ophthotech Expands Focus with Development for Ophthalmic Orphan Diseases, Provides Update on Zimura
Jan 26, 2017: Acucela Initiates Phase 2a Study of Emixustat Hydrochloride Addressing Patients with Stargardt Disease
Jan 05, 2017: Acucela Receives Orphan Drug Designation from the FDA for the Treatment of Stargardt Disease
May 26, 2015: Ocata Therapeutics Receives Three New U.S. Patents for its RPE Therapy for Macular Degenerative Diseases
May 04, 2015: European Medicines Agency Grants Orphan Designation for Makindus' MI-100 for Stargardt's Disease
Mar 31, 2015: Ocata Therapeutics Successfully Completes Dosing in Phase 1/2 RPE Studies
Oct 15, 2014: ACT Announces Positive Results from Two Clinical Trials Published in The Lancet Using
Differentiated Stem Cell-Derived Retinal Pigment Epithelium (RPE) Cells for the Treatment of Macular Degeneration

Sep 25, 2014: Advanced Cell Technology Announces Final Patient Treated in Stargardts Macular Degeneration Phase 1 Trial in the United Kingdom

Jul 17, 2013: ACT Secures Approval from Data Safety Monitoring Board to Complete Third Patient Cohort in All Three Clinical Trials

Jun 03, 2013: Oxford BioMedica Halts Recruitment Into Phase I/IIa Study Of StarGen

May 16, 2013: ACT Confirms Clinical Trial Participant Shows Improvement In Vision Following Treatment With Human Embryonic Stem Cells

Apr 23, 2013: ACT Initiates Higher-Dosage Patient Treatment In European Phase I Study For Macular Degeneration

Apr 15, 2013: ACT Treats First Patient With Better Vision In Clinical Trial For Stargardts Macular Dystrophy

Apr 01, 2013: ACT Initiates Treatment Of Higher-dosage Cohort In Clinical Trials For Dry Age-related Macular Degeneration And Stargardt's Macular Dystrophy

Mar 14, 2013: Advanced Cell Technology Receives DSMB Approval To Initiate Treatment Of Third Patient Cohort In All Three Clinical Trials Using hESC-derived RPE Cells
